

OtherWisz Creative is looking for a programmer/developer!

OW is looking for a part time programmer/developer to work in-house.
Possible on-call status in case of emergency... could become full-time.

Applicants must be able to work with open source applications such as Magento, Joomla and WordPress, often combining custom design themed-graphics onto these CMS solutions as well as researching and installing appropriate plugins to fit seamlessly into websites we design. Ability to create a well coded template from Adobe PSDs which will be provided is a must!

We are not looking for a designer, but you must have a well-rounded design sensibility.

Must have knowledge in the following:

- > HTML/DHTML
- > XML
- > JavaScript
- > CSS
- > PHP
- > Databases (SQL Server, Oracle Server, MySQL, etc.)
- > Apache & Linux web server
- > SSL certificates, setting up credit card processing
- > iPhone/iPad development

Other skills must include:

- > Researching and estimating solutions including time to implement
- > Documentation skills
- > Quality control
- > Cross-Browser compatibility (IE, Firefox, Mozilla, etc.)
- > Customer service skills
- > Troubleshooting/Tester/Trainer
- > Aptitude for detail

IT skills considered bonus as well as knowledge of search engine optimization.
Teamwork is key-- must be able to work with a close-knit team of graphic design and marketing folks in a non-traditional office setting.
